Jay Grafwallner

Senior Full Stack Software Engineer

Orlando, FL | (770) 580-3784 | jay.ai.us09@gmail.com

PROFESSIONAL SUMMARY

Senior full-stack engineer with 10+ years of experience delivering web applications from architecture and data modeling through testing, automated deployment, and production support. Hands-on experience with C#, ASP.NET MVC, .NET Core, React, TypeScript, SQL Server, Azure, and production RAG infrastructure. Leads technical decisions, reviews code, mentors engineers, and works with product and business stakeholders in Agile teams.

TECHNICAL SKILLS

C# and .NET: C#, .NET Framework, .NET Core, ASP.NET MVC, ASP.NET Core, ASP.NET Web API, Entity Framework

Frontend: TypeScript, JavaScript, React, Angular, HTML5, CSS3, Bootstrap, Tailwind CSS, responsive development

Data engineering and AI: Document ingestion and transformation, chunking, embeddings and vectorization, vector search, RAG pipelines, LLMs, LangChain, LangGraph

Data platforms: SQL Server, PostgreSQL, MongoDB, MySQL, Redis, relational data modeling, query tuning, indexing, caching

Cloud and delivery: Azure, Azure DevOps, App Service, Functions, AWS, GitHub Actions, automated builds and deployments, CI/CD, Docker, Kubernetes, Terraform

Quality and leadership: Unit and integration testing, TDD, Jest, JUnit, Mockito, peer code reviews, architecture decisions, mentoring, Agile Scrum

Additional backend: Java, Spring Boot, Node.js, Express.js, Python, REST APIs, microservices, authentication and authorization

PROFESSIONAL EXPERIENCE

Senior Full Stack AI Engineer / Senior Software Architect

Verizon | Florida Feb 2020 - Jul 2026

- Led architecture and hands-on implementation of enterprise web and AI applications, translating stakeholder requirements into technical plans and production releases.
- Developed AI-enabled workflows connecting .NET and Java services, databases, and internal APIs to support enterprise search and automation.
- Built production RAG pipelines covering document ingestion and transformation, chunking, embeddings, vector retrieval, contextual prompts, and responses linked to source material.
- Implemented permission-aware retrieval, authentication, authorization, and application data controls to protect sensitive enterprise information.
- Designed PostgreSQL and SQL Server data models and optimized indexes, caching, and API access for transactional and AI-assisted workloads.
- Set up automated build and deployment workflows using CI/CD, GitHub Actions, Docker, Kubernetes, and Terraform.
- Guided engineering decisions through architecture and peer code reviews, delivery planning, stakeholder communication, and mentoring.
- Supported releases through production monitoring, troubleshooting, and ongoing service maintenance.

Jay Grafwallner

PROFESSIONAL EXPERIENCE CONTINUED

Senior Full Stack Developer

DealerSocket | Westlake, Texas Mar 2016 - Jan 2020

- Developed and supported enterprise SaaS applications, REST APIs, and microservices using Java/Spring Boot and Node.js, with React and Angular frontends.
- Used Microsoft Azure and Azure DevOps pipelines to automate containerized builds, testing, deployments, and release operations.
- Designed PostgreSQL and SQL Server schemas and improved operational reporting through query tuning, indexing, caching, and asynchronous processing.
- Strengthened application quality with unit and integration tests using JUnit, Mockito, and Jest, alongside peer code reviews and production support.
- Implemented application security using OAuth 2.0, JWT, and role-based access control.
- Advised engineers on service design and delivery tradeoffs, working with product and business stakeholders in Agile development cycles.

Full Stack Developer

Expedia Group | Miami, FL Jan 2014 - Feb 2016

- Developed web applications and backend services using C#, .NET Framework, ASP.NET MVC, and ASP.NET Web API.
- Built responsive customer-facing websites, business portals, internal dashboards, administrative interfaces, and workflow applications.
- Created REST APIs for authentication, user accounts, reporting, document management, and business workflows.
- Implemented reusable C# business logic using layered architecture and modular service components.
- Used Entity Framework for data access and persistence in applications backed by SQL Server and MySQL.

EDUCATION

Bachelor of Science in Computer Science

University of Central Florida | Orlando, FL | Aug 2009 - May 2013
